

## **SYMBILITY RELEASES VERSION 4.0 OF MOBILE CLAIMS AND CLAIMS CONNECT**

---

**TORONTO, ONTARIO--(Marketwire – May 31, 2011)** - Symbility Solutions, Inc., a wholly-owned subsidiary of Automated Benefits Corp. (TSX:V – AUT), is proud to announce the release of the latest version of the Symbility Mobile Claims and Symbility Claims Connect applications.

New functionality has been introduced to better enhance and streamline the claims estimation process, as Version 4.0 has over fifteen new features. Symbility now communicates with providers of aerial roofing measurements. When synchronizing Mobile Claims, users receive a detailed report and an automatically generated 3D roof plan. This plan can drive a full 3D exterior plan of the house to build roofing and exterior estimates.

Another enhancement in Version 4.0 allows companies to define their own default Claim Structure when creating a new claim or when assigning a claim to a vendor. Using different tools, users can change the default Claim Structure by adding, removing, ordering and renaming diagrams, estimates, photo pages, forms or handwritten notes. Users also can create new Claim Structures based on the type of claim or type of loss.

In Version 4.0, Symbility has greatly improved its report engine in the Report Builder. This new flexible and lightweight engine gives users more options when creating, generating or viewing reports, provides them with a greater selection of charts, and allows the user to run multiple reports simultaneously.

“Acting as a communications hub, Symbility’s software solutions can easily integrate with leading vendors in the industry,” states Chief Technology Officer Marc-Olivier Huynh, Symbility Solutions Inc. “Our collaborative approach to claims technology allows adjusters in
