

Symbility Mobile Claims has a number of symbols that will change depending on the action that is being performed inside of a diagram. These symbols will appear in the diagram canvas or on various parts of a shape after an action has been selected.

| Icon | Symbol Name | Description |
|---|------------------------|--|
|  | Arrow | The Arrow is used to browse through Symbility Mobile Claims. If the arrow appears inside of the canvas, nothing has been selected. |
|  | Drawing Cursor | The Drawing Cursor indicates the system is in drawing mode. The next click made will draw the shape that has been selected. |
|  | Positioning Arrows | The Positioning Arrows indicate the user is able to move the position of the selected item. |
|  | Edit Mode | The hand symbol indicates Edit Mode . When the hand symbol is present, the user can click to manually adjust the name, size or dimension of the selected item. |
|  | Sizing Arrows | The Sizing Arrows indicate the user will adjust the size of a shape. Hover over different parts of a shape until the two-pronged sizing arrows are visible. |
|  | Square Sizing Handle | The square Sizing Handle indicates the user will adjust the size of a shape. Drag the sizing handle inwards or outwards to make a shape larger or smaller. |
|  | Circular Sizing Handle | The Circular Sizing Handle indicates the user will adjust the angle or orientation of the selected shape. |
|  | Freeform Cursor | The Freeform Cursor indicates that the freeform tool is activated. The system will attempt to draw a wall inside the canvas. |
|  | Freeform Rotate Cursor | The Freeform Rotate Cursor indicates that the freeform rotate pan tool is activated. You can view your drawings in 3D by picking up and dragging your drawings. |
|  | Window | The Window symbol is indicated by a straight line connecting two square sizing handles when it is selected. |
|  | Opening | The Opening symbol is indicated by an empty space between two square sizing handles when it is selected. |
